Shaik Sameer

Hyderabad, India
sameermech1122@gmail.com — linkedin.com/in/shaik-sameer-027855167 — +91 9603218622

Professional Summary

AI Engineer and Python Developer with hands-on experience in Python development, Generative AI, OpenAI API integration, automation, data processing, and backend application development. Skilled in building LLM-powered applications using Python, FastAPI, REST APIs, OpenAI API, RAG, AI Agents, Agentic AI, SQL, Pandas, NumPy, Git, . Experienced in developing conversational AI solutions, data-driven chatbots, intelligent automation workflows, and API-integrated applications. Strong interest in building scalable enterprise AI solutions and production-oriented GenAI applications.

Technical Skills

- **Programming:** Python, SQL, Object-Oriented Programming, Data Structures, Exception Handling
- **Backend Development:** FastAPI, Django, REST APIs, API Integration, Pydantic
- **Generative AI:** OpenAI API, Generative AI, LLMs, Prompt Engineering, RAG, Retrieval-Augmented Generation, LangChain, LangGraph, AI Agents, Agentic AI, Embeddings, Vector Databases
- **AI Engineering:** Conversational AI, LLM Application Development, AI Automation, Agent Workflows, Tool Calling, Workflow Orchestration, Intelligent Automation
- **Data:** Pandas, NumPy, PostgreSQL, SQL, Excel, Data Cleaning, Data Processing, Data Analysis, Data Visualization
- **Testing:** PyTest, API Testing, Unit Testing, Debugging, Error Handling

Work Experience

CGS India Private Limited
Technical Support Engineer – AI Solutions / Agentic AI *Hyderabad, India*

- Developed Python-based AI and automation solutions using Generative AI, LLMs, and OpenAI technologies for intelligent business workflows.
- Designed Agentic AI workflows for multi-step task execution, including task decomposition, decision logic, workflow routing, and controlled execution.
- Integrated OpenAI APIs with Python applications to build context-aware AI capabilities and LLM-powered workflows.
- Developed modular AI workflows using LangChain and LangGraph concepts for agent orchestration and intelligent task automation.
- Applied prompt engineering techniques to improve the relevance, consistency, structure, and quality of LLM-generated responses.
- Worked with REST APIs, Python backend components, SQL, and automation workflows to integrate AI capabilities with application processes.
- Performed testing, debugging, validation, and error handling for AI applications, API integrations, and automated workflows.

Wipro Technologies
Project Engineer – AI- Engineer *Hyderabad, India*

- Developed Python-based automation solutions to streamline repetitive business processes and improve operational efficiency.
- Integrated OpenAI API with Python applications to develop conversational AI and data-driven chatbot capabilities.
- Built an OpenAI-powered chatbot capable of processing Excel data and generating natural-language responses based on business data.
- Developed Python scripts for data processing, automation, validation, transformation, and application workflows.
- Worked with SQL, Excel, APIs, and structured datasets for data retrieval, processing, analysis, and automation use cases.
- Applied prompt engineering techniques to improve the accuracy, relevance, structure, and consistency of LLM-generated responses.
- Collaborated with project stakeholders to understand business requirements and develop Python-based AI and automation solutions.

Projects

Enterprise AI Knowledge Assistant – RAG *Python — OpenAI API — LangChain — RAG*

- Developed an AI-powered knowledge assistant using Python, OpenAI API, LangChain, and Retrieval-Augmented Generation (RAG).
- Implemented document processing, text chunking, embeddings, semantic retrieval, and context-aware response generation.
- Designed API-based workflows for querying enterprise knowledge and generating responses grounded in retrieved information.

Agentic AI Automation Assistant *Python — OpenAI API — LangGraph — AI Agents*

- Designed an Agentic AI workflow for automating multi-step technical and business processes using LLM-based decision making.
- Implemented task decomposition, agent orchestration, tool calling, workflow routing, and controlled task execution.
- Integrated Python APIs and backend services to support automated actions and structured responses.

OpenAI Data Analysis Chatbot *Python — OpenAI API — Pandas — NumPy — Excel*

- Built a conversational chatbot using OpenAI models to answer natural-language questions and analyze Excel-based business data.
- Implemented Python-based data processing using Pandas and NumPy to transform and analyze structured datasets.
- Designed prompt and processing workflows to generate data-driven responses from business information.

Additional Project

Python-CATIA Automation

- Developed Python scripts to automate repetitive CAD modelling tasks in CATIA, reducing manual effort and improving modelling consistency.

Patent

Autonomous Biryani Cooking Machine

- Developed an automated cooking machine using Arduino, servo motors, pumps, sensors, and programmed control logic.
- Patent Application No. 202241054169, published September 2022.

Education

B.Tech in Mechanical Engineering 2019 – 2022
Chalapathi Institute of Engineering and Technology, Guntur *70%*

Diploma in Mechanical Engineering 2016 – 2019
Chalapathi Institute of Technology, Guntur *75%*

Certifications

AI Data Scientist Course – Centurion University of Technology and Management

CCNA – Cisco Certified Network Associate – Zoom Technologies
